

Parcel Lockers in Healthcare: Bringing security and convenience to the forefront

Organizations around the world are changing the way they work to become more effective and efficient. In healthcare settings, interactions occur routinely between members of staff, and patients. By introducing tech-forward solutions into healthcare, you provide greater control over these interactions and reduce person-to-person contact, while creating an optimized process for patients to engage within the healthcare system.

Parcel Pending by Quadient's Parcel Locker Solutions automate and facilitate staff and patient exchanges. Whether you are distributing documents and records, or issuing testing kits to patients, our lockers will ensure a contactless workflow, while streamlining collection and drop-off through a secure and convenient process.

WEB TRACKING SYSTEM (WTS)

Get full visibility into your internal delivery process by integrating Quadient's proprietary Web Tracking System (WTS). WTS is a cloud-based solution that tracks parcels and other important mail and items in real-time from receipt and transit, all the way to the final delivery to the end recipient.

IMPROVED OPERATIONAL EFFICIENCY

Intelligent parcel lockers enable staff members to focus on patient care by acting as an exchange hub for a range of applications, including distributing and collecting patient test kits, documents and samples, as well as all inbound and outgoing mail and parcels. Parcel lockers streamline everyday health processes, creating a secure and convenient way to facilitate daily operations.

REDUCE OPERATIONAL COSTS

Parcel Lockers reduce labor time and extra expenses associated with the arrival of items onsite. In addition, smart lockers help to mitigate the risk of lost, stolen, or damaged items, removing the potential for unforeseen additional expenses and liabilities.

CONTACT FREE

Parcel lockers provide a contactless collection and drop-off for patients and clinics. Our touchless workflow streamlines processes to reduce time, maximizes efficiency, while safeguarding the health of patients and workers.

INCREASE PATIENT SATISFACTION

Improve the patient experience by creating a self-service collection and drop-off process. Our lockers use an electronic notification process that automatically informs patients when their testing kit or other important documents are ready for collection. This cuts patient wait times, and creates an organized and simplified process.

Parcel Pending by Quadient's Indoor and Outdoor locker solutions offers healthcare providers a secure, self-service offering for staff and patient exchanges. The smart locker's strong metal frame keeps items safe from damage and theft, while the sleek design immediately enhances any indoor or outdoor space, all while reducing the risk of error and person-to-person contact.

Our healthcare locker solutions serve facilities of all shapes and sizes, including:

Hospitals

Pediatric hospitals

Long-term care (LTC) facilities

Skilled nursing facilities (SNFs)

Scalable configurations

Our lockers scale to your changing business needs and are custom configured to your environment. They are available in various dimensions to accommodate a wide range of item sizes and can be customized to match your branding or aesthetic. In addition, you can add or change locker towers seamlessly as your business needs evolve.

Intelligent IT infrastructure

Our cloud-based platform for efficient network management provides real-time monitoring and alerts to effectively monitor, while providing user and device management tools, tracking, and notification management.

Our proven, open APIs make integrations a cinch for IT teams. We also offer customized integrations to meet specific project requirements.

ABOUT PARCEL PENDING BY QUADIENT

Parcel Pending by Quadient is the leading provider of package management solutions for residential, commercial, retail, and university properties in the United States and Canada. With nearly 3 million packages successfully delivered monthly, we offer a wide range of solutions that ensure the simple and secure delivery and retrieval of packages and online orders.
