

Healthcare Patient Communications Made Easy

Many healthcare organizations rely on outdated manual and labor-intensive processes to send critical patient communications such as statements, consent forms, release of information requests and insurance documents.

Every day external factors, like rising patient expectations, government mandates including HIPAA, and a remote workforce are adding more complexity to your mailing operations. In today's rapidly changing environment, the ability to adapt and respond to ongoing challenges will determine your long-term success.

Now more than ever, healthcare organizations are rethinking how they manage and send critical customer communications.

Quadient offers user-friendly, scalable solutions that automate your entire patient communication workflow to help you meet business challenges now and in the future. Our solutions give you the flexibility to send transactional documents via any combination of channels - Print, Digital or Outsource, depending on which delivery channels make the most sense for your organization and your patient preferences.

Designed to meet the needs of healthcare organizations which require the ability to support both legacy systems and processes, Quadient's best-in-class suite of solutions provide healthcare organizations the agility to respond and adapt quickly to customer, regulatory and business demands.

“

Estimated timelines, speed estimations and budget were bang-on. When all is said and done, we feel like Quadient has been a true partner with us versus the more traditional customer-vendor relationship.

— Kevin Allen, Director of Operations, BACTES Imaging Solutions, San Diego.

“

We were spending eight hours per day between two people manually addressing envelopes. Now the whole process takes less than an hour. Quadient's software not only reduces the associated labor for our mail operations, but it also helps prevent the wrong patient information from being placed in the wrong envelope. As the pages are barcoded to match the address page of each recipient, the system stops if all of the barcodes don't match up or if the pages are not in the right order. This is an important safety element that can prevent the unintended disclosure of patient information to the wrong recipient.

— Paula Dascher, BS RHIA Manager, Clinical Documentation and HIM Technology at Seattle Children's Hospital

61% of surveyed organizations reduced their overall costs by **25%** or more using Quadient Impress

52% of surveyed organizations realized at least a **50%** reduction in time spent processing mail

TechValidate, November 2019

AN ALL-IN-ONE DOCUMENT AUTOMATION PLATFORM

Evolve and scale with intelligent document output automation

Significantly decrease the time it takes to prepare mail while ensuring document integrity and security. Impress Automate not only drives employee efficiency by eliminating repetitive manual tasks but also promotes employee engagement by enabling them to focus on higher-value assignments. Automating your document preparation and distribution process reduces your exposure to potential errors and compliance risks. When used with mailing equipment, such as a folder inserter, Impress Automate manages pre-set business rules to ensure the right document goes into the right envelope.

Digital document delivery made easy

Send critical patient communications through an eco-friendly, branded and secure document portal. Impress Portal makes it easy for you to offer your patients' digital delivery, as well as promote your corporate identity. Impress Portal speeds up the document delivery process by replacing paper-based communications, saving you money on postal costs and mailing supplies, while enabling faster payments and accelerating cash flow. Impress Portal provides robust search and tracking capabilities. Documents are automatically stored for easy retrieval allowing your patients to self-serve for an improved experience.

Consolidate your desktop communications

Ideal for healthcare organizations with an on-site or remote workforce, Impress Dispatch leverages your existing infrastructure and enables you to consolidate desktop communications from multiple locations. Users simply prepare outgoing ad hoc documents from their desktop and send them directly to a centralized mail production center or to secure document portal. A built-in approval process helps you maintain control and consistency over your patient communications, ensuring they are polished, professional and promote a positive experience.

Send patient communications in just a few clicks

Quadient's unique outsourced hybrid mail solution handles all of the preparation and delivery of your business communications - in just a few clicks. Users upload documents via a user-friendly SaaS application to Quadient's mail production facility that prints, sorts, stuffs, meters and even delivers your mail to the post office.

The Quadient Impress platform gives you the flexibility to send transactional documents via any combination of channels - Print, Digital or Outsource.

ADDITIONAL PRODUCTS AND SERVICES

Simplify the Preparation, Tracking and Storage of Your Certified Mail® with Return Receipt™

Centralize the processing of Certified Mail with Return Receipt and track your documents directly through the United States Post Office®. Preparing your Certified Mail with Return Receipt electronically saves time and money, enabling you to access specific delivery information and images of recipient signatures, all securely stored in the cloud.
